Digitizing the Sound Explosions of Anglo phone Caribbean Performance Poetry

font eurb5

Janet Neigh

The Internet offers new performance plat forms for Caribbean poets who prioritize oral expression. One group realizing this potential is the youthled artist collective The 2 Cents Movement, based out of Trinidad and Tobago, who circulate their video po ems on social networking sites. Through their DIY approach, they are building a broader youth audience for their work. More generally, Caribbean poets are often un derrepresented in online poetry resources, particularly in institution based Internet audio archives. This article uses The 2 Cents Movement as a preliminary model to un derstand how Internet audio archives can be redesigned to amplify the total expres sion of Caribbean poetry. Admittedly, The 2 Cents Movement offers a partial solution to a much bigger problem however, this ar ticle demonstrates the value of examining poets engagements with digital technolo gies to develop better archival standards and practices in sync with the politics of the work.

Introduction

If Louise Bennett, the prolific Jamaican artist, were still alive and performing today, how would the Internet fit into her creative practice Would she post poetry recordings on Facebook Would children play with a Miss Lou app Would Aunty Roachy deliver wisdom via Twitter Since she embraced emerging technologies to teach her audience about the value of the Jamaican lan guage, social media likely would have played a prominent role in her education activism. She turned to performance early in her career to build an inclusive audience, and her media projects for the Jamaica Broadcasting Corporation her childrens television show Ring Ding 197082 and herradio program Miss Lous Views 196682 gave her an expanded terrain to develop her call andresponse poetics. Unfortunately, search ing for Louise Bennett online today yields few actual sound recordings of her poetry. Ben netts underrepresentation onlineor, more aptly, her silence, since her words can be found but rarely her voice is characteristic of Caribbean poetry more generally. This article stems from concern about who has the power to define poetry in virtual spaces and whose voices re ceive airtime. As Kamau Brathwaite establishes in his groundbreaking lecture History of the Voice, Anglophone Caribbean poetry should be celebrated for its sound explosions, yet it has remained relatively quiet online.1

Internet audio archives for poetry have flour ished in recent years. Websites such as Penn Sound, The Poetry Archive, the Poetry Foundation, the Academy of American Poets, and UbuWeb have provided excellent resources for contemporary poetics. These twenty first century open access collections offer both live and studio recordings, roundtable discussions of poetry, lectures,

¹ Edward Kamau Brathwaite, History of the Voice The Development of Nation Language in Anglophone Caribbean Poetry London New Beacon Books, 1984, 13.

and taped interviews. While these digital plat forms promise democratization, they often re peat the exclusions of print archives. Many of these collections, which now determine the content of poetry syllabi in university class rooms, reinforce the United States as the dom inant center of Anglophone poetry in the Amer icas.² For example, the Poetry Foundation has 3,649 author pages, almost half of which are devoted to US poets. The site features only eleven poets from the Caribbean region, ex cluding many major voices from the region, in cluding Louise Bennett. Of the eleven Caribbean poet pages, none include audio poems and only seven of them include actual poetry texts the other four just feature short author bios. Not only are Caribbean poets underrepresented in these curated collections but their online presence is often sparse, limited to random YouTube videos.³

Despite their underrepresentation in web based audio collections, many contemporary Caribbean performance poets have embraced digital technologies to build their audiences. These new digital poetries offer a solution to what Laurence A. Breiner has characterized

² See PennSound Transforms How Poetry Is Taught the World Over, Penn News, 26 June 2014, http://www.upenn.edu/pennnews/news/pennsoundtransformshowpoetry taughtworldover.

For a discussion of race in digital canons, see Amy E. Earhart, Can Information be Unfettered Race and the New Digital Humanities Canon, in Mathew K. Gold, ed., Debates in the Digital Humanities Minneapolis Univer sity of Minnesota Press, 2012, Open Access Edition, http://dhdebates.gc.cumy.edu. Earhart urges that we need to examine the canon that we, as digital humanists, are construct ing, a canon that skews toward traditional texts and excludes crucial work by women, people of color, and the GLBTQ community.

as the halflife of Caribbean performance po ems. According to him, readers unable to at tend a poems live recitation are always at a disadvantage, because things like tone, ges ture, and the poets relationship with her audi ence also determine meaning. In terms of dis tribution, digitized poetry recordings, unhin dered by shipping fees and trade tariffs, sur pass print books in their international porta bility, making them more accessible to Caribbean diasporic communities.

Figure 1 2 Cents Movement Poet

This article examines one of the best examples of innovative digital poetry in the Caribbean the youthled artist collective The 2 Cents Move ment, based out of Trinidad and Tobago, who use social networking sites to circulate their video poems. Students at the University of the Southern Caribbean started the movement in 2010, and their activities have strengthened youth enthusiasm for spokenword poetry. Some

⁴ Laurence A. Breiner, The HalfLife of Performance Poetry, Journal of West Indian Literature 8, no. 1 1998 20.

of their activities include islandwide school tours, openmic nights, slam contests, televi sion and radio broadcasts, video production of poems, and student poetry workshops. They present themselves as a movement to align their poetry with social change. Their digital record ings become modes of production, publication, distribution, preservation, and community ac tivism. Their populist approach builds on the vernacular pedagogical dynamics of perfor mance established by figures like Louise Ben nett. By using these technologies to integrate creative and political praxes, The 2 Cents Move ment realizes Brathwaites theory of nation language and his argument that sound repro duction technologies can be used to reinvigo rate Afrocentric oral traditions.⁵

Brathwaite identifies how nation language poets challenge the way that paper records were used to discredit oral ways of knowing and uphold institutional power during colo nization. When a dub poet like Linton Kwesi Johnson recites definitive works such as Reg gae Sounds, lines such as footdrop find drum, blood story / bass history is a moving / is a hurting black story attack printcentric forms of knowledge. 6 He builds on a history of Caribbean people using performance to circumvent the print archive to produce, record, and trans mit knowledge through embodied acts. 7 Such knowledge depends on the interaction between the performer and her audience. The format of Bennetts Ring Ding, where she would invite children from the studio audience to join her

 $^{^{5}}$ Brathwaite, History of the Voice, 13.

⁷ Here I draw on Diana Taylors analysis of what she calls the repertoire to characterize how performance acts create cultural memory in the Americas. See Diana Taylor, The Archive and the Repertoire Performing Cultural Memory in the Americas Durham, NC Duke University Press, 2003.

on stage to recite poetry with her, exemplifies this well. Such communal pedagogies also extend to adult audiences. For example, Oku On uora defines the goal of dub poetry as consciousness raising It also mean to dub out the isms and schisms and to dub consciousness into the people dem head. Performance creates what Brath waite characterizes as total expression, en gendering a space for collective, politicized vernacular consciousness to take shape

The other thing about nation language is that it is part of what may be called total expression. . . . Reading is an isolated, individualis tic expression. The oral tradition on the other hand demands not only the griot but the audi ence to complete the community the noise and sounds that the maker makes are responded to by the audience and are returned to him. Hence we have the creation of a continuum where meaning truly resides. 9

Although Brathwaite seems to be arguing here that the full experience of the sonic con tinuum depends on live interaction, he actu ally emphasizes the opposite. A central point of his text, originally titled an electronic lec ture for his 1979 Harvard presentation, har nesses the potential of sound reproduction technologies to create new pathways for total expression. For him, they intensify the detona tions within Caribbean soundpoetry that have imploded us into new shapes and conscious ness of ourselves. 10 Brathwaites combustion metaphors of detonations and explosions re veal his prioritizing of electronic sound. As Jonathan Sterne establishes, All soundreproduction technologies work through the use of trans ducers that convert acoustic waves into elec tronic impulses. 11 Brathwaite suggests that

⁸ Quoted in Mervyn Morris, Is English We Speaking and Other Essays Kingston Ian Randle Publishers, 1999, 38.

⁹ Brathwaite, History of the Voice, 1819 italics in original.

¹⁰ Ibid., 49.

these energy conversions amplify total expression rather than weaken it, which The 2 Cents Movement substantiates.

So much scholarship focuses on written doc uments and techniques from the past, yet many digital humanists are early adopters. They embrace the unfinished, they invite collabo ration, they move us off the page, and they aim to build things for the future. Inspired by this approach, this article uses The 2 Cents Movement as a preliminary model to under stand how Internet audio archives can be re designed to amplify the total expression of Caribbean poetry. Admittedly, The 2 Cents Movement offers an incomplete solution to a much larger problem however, I argue that we need to begin by examining poets engage ments with digital technologies to develop bet ter archival standards and practices in sync with the politics of the work. In this collabo rative spirit, I also invite readers to click on the links as they read this article, to immerse themselves in whats already online, and to think about how we can build on this virtual world of Caribbean poetics.

Part of what makes Brathwaites History of the Voice an important catalyst for building digital archives is that he avoids the tendency in oral scholarship to fixate on the live event. For example, Hugh Hodges stresses the difficulty of studying performance poetry, lament ing that we typically examine only the textualized trace of it. He considers sound and video recordings as texts, because he argues

Jonathan Sterne, The Audible Past Cultural Origins of Sound Reproduction Durham, NC Duke University Press, 2003, 22.

Hugh Hodges, Poetry and Overturned Cars Why Perfor mance Poetry Cant Be Studied, and Why We Should Study It Anyway, in Susan Gingell and Wendy Roy, eds., Lis tening Up, Writing Down, and Looking Beyond Inter faces of the Oral, Written, and Visual Waterloo, ON Wilfrid Laurier University Press, 2012, 98.

that the total expression of the live event does not get captured on them. Similarly, Peggy Phelan claims that what she calls liveness dis appears in recordings of a performance. 13 As Sterne puts it, this attitude upholds faceto face communication and bodily presence as the yardsticks by which to measure all commu nicative activity and defines sound reproduc tion negatively, as negating or modifying an undamaged interpersonal or facetoface cop resence. 14 Brathwaite takes a more innovative approach to sound reproduction technologies by highlighting their capacity to challenge printcentric aesthetics. The 2 Cents Movement demonstrates how digital technologies provide even more opportunities for this through their use of music videography and microblogging. However, what Brathwaite envisioned over 30 years ago through resonating tapes, eight tracks, and LPs has yet to be fully realized in the broader terrain of our research methodologies and po etry resources. 15

Critical approaches to performance poetry have been slow to develop because of the West ern assumption that the text of a poemthat is, the written document is primary and that the recitation or performance of a poem by the poet is secondary and fundamentally inconse quential to the poem itself. While the digital should free us from our obsession with a textbased idiom in literary studies, it has yet

As Phelan describes, Performances only life is in the present. Performance cannot be saved, recorded, doc umented, or otherwise participate in the circulation of representations of representations once it does so, it becomes something other than performance. Peggy Phelan, Unmarked The Politics of Performance New York Routledge, 1993, 146.

Charles Bernstein, ed., Close Listening Poetry and the Performed Word New York Oxford University Press, 1998, 8.

to do so. 17 As this article demonstrates, even the designs of most online poetry audio collections still privilege the methodology of tex tual close reading rather than encourage us to develop new soundbased methods of analy sis. 18 In a similar vein, recent efforts to build Caribbean digital archives have focused on converting print documents and have not en gaged as much with sound media. 19 Resources and funding certainly drive this, since print materials are easier and cheaper to digitize. Yet given the oral dimensions of Caribbean cultures, we must address how to represent and archive performance to overcome the structural biases of print archives.

Creating Digital Griots The 2 Cents Movement

Scrolling through The 2 Cents Movements Facebook page reveals a vibrant online poetry community. As of December 2015, they have

¹⁷ For a discussion about the neglect of sound analysis in digital literary studies, see Tanya Clement, David Tcheng, Loretta Auvil, Boris Capitanu, and Megan Mon roe, Sounding for Meaning Using Theories of Knowledge Representation to Analyze Aural Patterns in Texts, Dig ital Humanities Quarterly 7, no. 1 2013, http://www.digitalhumanities.org/dhq/vol/7/1/000146/000146.html.

¹⁸ Although I do not have the space in this article to ex plore their work, studying the standards and practices developed by music historians for online collections such as the Naxos Music Library would be another fruit fulline of inquiry to help literary scholars move beyond textbased approaches.

¹⁹ While there are Caribbean sound archives, such as Ra dio Haiti, in Caribbean literary studies print archiving is much more prevalent. For example, major collections, such as the Digital Library of the Caribbean, while ex cellent, primarily hold literary materials converted from print documents.

Figure 2 Audience Interaction

more than 13,000 followers, and their page in cludes announcements about upcoming perfor mances, photographs of performances, polit ical news updates, links to livestream their events, and video poems. Its campus origins explain why Facebook, a social networking site designed for college students, has played a central role in the development of the move ment. The founder, Jean Claude Cournand, an undergraduate at the time, sought to build a stronger intellectual youth cultureto invite youth to put in their two cents by expressing their views on current issues ranging from mar ijuana legislation to homophobia through spoken word poetry. In an interview, he explained that they chose to go into the digital habitat rather than trying to reach people through events alone, in order to attract a youth au dience.20 Their bestknown projects are the In

tercol and Verses national slam competitions, held annually as part of the Bocas Lit Festi val Verses was recently renamed the First Cit izens National Poetry Slam. The two differ ent slamsIntercol features high school teams, and Verses features prominent poets who com pete individually reflect their mentorship struc ture. The 2015 winner of the Intercolslam, Michael Logie, got to pick a 2 Cents Movement poet as a mentor to work with him for a year to help him develop his poetry.²¹ The 2 Cents Movement has also collaborated with the Trinidad and To bago Radio Network on the Free Speech Project, where young artists recite their poems weekly on the radio. These poems are also produced as videos and archived on the networks YouTube channel. The majority of the movements activ ities are coordinated and advertised online, and major events like the slam contests can be livestreamed. They exist solely through freely accessible sites and do not have their own server or domain name, which suggests that a lack of resources does not need to be an obstacle to building an online presence for Caribbean poetry. In addition to reaching youth in Trinidad and Tobago, they have gained an international following by circulating their poetry on social media.

Their Twitter and Facebook updates for their 20142015 Courts Bocas Speak Out Tour of more than fifty secondary schools demonstrates their use of these platforms to enhance audience interaction. During this tour, some of the nations best performance poets mentored high school students as they wrote and performed their own works through performances and workshops. These school visits provided a way for The 2 Cents Movement to promote the Intercol slam competition. Photo livetweets of

their tour performances often focused on the students actively participating in the audience rather than on the poet performing. In these shots, the camera points at the audience, of ten catching only the performers back or the corner of her shoulder.²²

Figure 3 Audience interaction

The online viewer gets to stare out at the au ditorium filled with students, which allows her to occupy the performers gaze but also view a students face as a mirror, inviting her to identify with both the performer and the audience. This elaborates on the pedagogy offered during the tour, where the poets per formances provide students with a model for

See their Twitter page https://twitter.com/2CentsMovement. See also their individual albums on their Facebook page, where some of their school tour photos are collected. For example, see the album Five Rivers Sec Speak Out Tour 2014 Day 27 https://www.facebook.com/media/set/seta.610565055739844.1073741948.125245237605164type3.

Figure 4 Poet performer

their own poetry aspirations. Visually, Twit ter and Facebook followers become situated in the continuum of total expressionin the reciprocal exchange between performer and au dience.

High school students who attended a 2 Cents Movement performance at their own school could then follow them on Twitter and Face book and connect these images to their own participation in the live event. The photos and the movement as a whole downplay individual author celebrity in favor of building a student focused collectivity. The 2 Cents Movement uses Twitter and Facebook to create a constancy of presence to link together different high school communities in Trinidad and Tobago.²³

Although these social media platforms governed by the commercial needs of USbased multinationals certainly hold limitations, rhetoric scholar Kevin Adonis Browne stresses the possibility for subversive adaptation. Examining

Dhiraj Murthy, Twitter Social Communication in the Twitter Age Cambridge, UK Polity Press, 2013, 39.

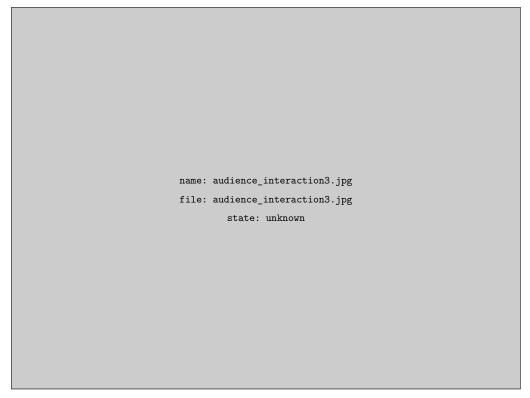

Figure 5 Audience interaction

Caribbean Internet users chatting, blogging, and videosharing practices, he illustrates how users adapt everyday vernacular practices to assert their presence in digital public spaces that often render them invisible. While his argument relates to individuals everyday en counters online rather than largescale digi tal projects, the parallels he establishes be tween a carnivalesque imperative and the In ternetlendinsightinto The 2 Cents Movements adaptation of social media to expand on the power of total expression in online environ ments.24 Rather than view Caribbean folk cul tures in opposition to digital forms, Browne views the inventiveness of both as part of what makes them compatible. He demonstrates how

Kevin Adonis Browne, Tropic Tendencies Rhetoric, Popular Culture, and the Anglophone Caribbean Pittsburgh University of Pittsburgh Press, 2013, 129.

communal vernacular practices easily trans late to an online environment because they emerge out of a history of adaptability nec essary for those who have had to find a way or make one when none seemed available.25 For example, in the colonial era, musicians invented steel pan drumming to get around the ban on using actual drums and managed to make noise in a colonial environment that aimed to silence them. Corporate social me dia platforms also curtail creative expression through their circumscribed structures. Such restrictions often reinforce the majority voice, yet Facebook and Twitter have also proven them selves useful for the growth of subcultures and movements.

Media scholars have identified how Facebooks interface encourages users to adopt neolib eral values. The anthropologist Alex Fattal draws a connection between a users desire to gain as many likes and friends as possible and Facebooks corporate desire to become the most dominant social network in the world, charac terizing this as the unspoken logic of accumu lation and curiosity that undergirds the plat form.²⁶ To what extent can this logic of accumu lation and curiosity, which sounds eerily sim ilar to older imperial impulses, be disrupted By using social media to augment their per formance events, The 2 Cents Movement inter cepts this logic of accumulation by bringing users into the dynamic of total expression. While scholars often critique Facebook for weaken ing facetoface sociality, The 2 Cents Movement reveals how it can be used to deepen social con nections.27

²⁵ Ibid., 134.

Alex Fattal, Facebook Corporate Hackers, a Billion Users, and the GeoPolitics of the Social Graph, Anthropolog ical Quarterly 85, no. 3 2012 931. See also Ilana Ger shon, UnFriend My Heart Facebook, Promiscuity, and Heartbreak in a Neoliberal Age, Anthropological Quarterly 84, no. 4 2011 86594.

Through social media, they also make their performances part of everyday life. People browse Facebook as they ride the bus to work, or as they wait in line at the grocery store. The 2 Cents Movement often depicts the perfor mance dynamics of such quotidian spaces in their studioproduced video poems available on YouTube. For example, their most popular video poem Maxi Man Tracking School Gyal originally titled Yankees Gone, by Crystal Skeete, takes place on a Curepe street and on a bus. Skeete addresses her concern about adult males sexually preying on underage schoolgirls by writing a poem in the voice of a teenage girl who refuses their advances. Similar to ear lier women poets like Miss Lou and Jean Binta Breeze, she uses the dramatic monologue to give voice to women who are denied respect in the public sphere. Through social media her video becomes even more impactful because a viewer might be in that particular social space as she watches the poem and even be witness ing what Skeete describes. This restores an im portant aspect of Caribbean oral traditions, where yard performances blend into everyday practices rather than become isolated special events. Miss Lou had a similar aim in her mar ket women poems, yet her ability to connect her audience to her settings was often restrained by the artifice of the theater stage. By cre ating a tangible bond between their reallife users and the mediated voices in their poems, The 2 Cents Movement invites users to do more than merely like their status updates and con tinue scrolling.

In addition to microblogging their performances, The 2 Cents Movements video poems, like Skeetes Maxi Man, demonstrate how au diovisual recording technologies can be used

For a critique of Facebook as a community building form, see Jos Marichal, Facebook Democracy The Architec ture of Disclosure and the Threat to Public Life Abing don, Oxon, UK Ashgate, 2012.

Figure 6 Embedded video. Youtube url https://youtu.be/90A8eLoPylU

to enhance the communal dynamic of total ex pression. Their videos challenge the idea that poetry depends on print publication, since many of their wellknown poems are available only in this format. By getting us off the page, their videography expands the possibilities for how we might edit and archive performance poetry. Released in 2013, Skeetes video went viral on social media and received more than 88,000 views on YouTube.28 Her poem exemplifies the 2 Cents Movements approach, in that she ini tially attended one of their workshops as a medical student and she is now a leading poet in the movement. She won the 2013 Verses po etry slam with her performance of this poem however, the popular version on The 2 Cents Movements YouTube channelis a studio record ing made by Beat Oven Productions with videog raphy by Denithy. Rather than aim to recreate the experience of the live performance event, the video invites a viewer to feel included in

Crystal Skeete, Maxi Man Tracking School Gyal, YouTube video, 5.27, posted by The 2 Cents Movement, 25 June 2013, https://www.youtube.com/watchv9OA8eLoPylU.

the street scene being depicted. Through their synthesis of the dramatic monologue form and the music video genre, Skeete and the 2 Cents Movement team cultivate a sense of audience connection and encourage dialogue beyond the space of the poem.

Figure 7 Maximan cast

Skeete dresses in a government school uniform to play her character in the video. Her embod iment of the character creates a dialogic relationship between her persona and her words because her recitation critiques the behavior that she acts out. The dramatic monologues implied addressee is another high school girl who is swayed by a maxi mans advances. The speaker warns her that these free rides are going to end in horror / trust me / with that nine month sentence things does go sour. 29 Skeetes conversational style, enhanced by the video editing and camera angles, encourage the viewer

Skeete, Maxi Man hereafter cited in text. Since I tran scribed the quotations from a recording, any inaccura cies are mine.

to feel as though Skeete is speaking directly to her. Standing in the middle of the street, Skeete begins with the lines, Posing on every street corner / this is the resurrection of Jean and Dinah... No Yankees here / only maxi man conductor. Referencing Mighty Sparrows ca lypso hit Jean and Dinah, about how the pres ence of a World War II US army base led to prostitution in Trinidad, she draws attention to how girls getting free bus rides from maxi men for sexual favors recreates a similar dy namic. Through an intergenerational call and response, she situates her poem in the Trinida dian oral tradition. Skeetes poem exemplifies how The 2 Cents Movement aims to cultivate a socially conscious form of learning that val ues vernacular language and knowledge.

Similar to music videos, Skeetes recitation alternates between a voiceover and her char acter speaking onscreen. By playing with the boundaries between diegetic and nondiegetic sound, the editing capitalizes on sounds per meability, encouraging her virtual audience to feel a closer connection to her words. Skeetes voice extends beyond the boundaries of the video and infiltrates the listening space, col lapsing the distance between the onscreen per formance and the audiences experience of it, especially if they happen to be in a similar set ting.

In the narrative that unfolds, the camera angles accentuate Skeetes embodied performance. While conventional music videos of tensexually objectify womens bodies, the jump cuts between medium shots, medium long shots, and closeups often from a slight low angle emphasize Skeetes power as she dramatizes her characters selfactualization and encourages other girls to do the same. Skeetes words combined with the camera work challenge the male gaze to create a virtual space of female community. This reaches its peak when the speaker sits in the back of the van reciting her critique

and a reverse shot depicts the maxi man gaz ing at her in the rearview mirror. His gaze is literally reflected back at him, while the speaker verbally refuses his objectification. In the middle of the van, a girl flirts with an other maxi man. Throughout the poem, the speaker seems to completely condemn this be havior however, the poem ends with a surprise twist. As she gets out of the maxi mans van, she tells the audience, This brownskinned gyal / going home and mind she child, indicating that her advice is based on her own mistakes with a maxi man Skeete. This surprise ending builds the speakers authority not by separat ing her from her community but by underscor ing her participation in it and encourages school girls watching the poem to trust her advice.

In the live performance of Maxi Man Track ing School Gyal, Skeetes critique of sexual harassment is likely powerful however, the video format allows a viewer to experience with greater clarity the embodied experience of resisting sexual harassment on the street. For female viewers who went through some thing similar, the recreation of the scene and its provocative ending deepens their identification with the speaker. Like a griot, Skeete speaks for a community of young girls, or rather speaks with them, as her performance encour ages them to bring their experiences into their interpretation of the poem.

Unlike many poetry recordings available on line, which are taped at live events, The 2 Cents Movement engages technologies as part of the artistic composition of the poem through their studioproduced poems. By borrowing from music videography, they invite us to see per formance archives as something more expansive than as a place to simply store copies of original live events. This moves us move be yond what Sterne characterizes as the preoc cupation with fidelity, which advertisers established early on in sound reproduction his tory. Sterne reveals how sound fidelity is a

story that we tell ourselves to staple separate sonic realities together. It maintains the illu sion of reproduced sound as a mediation of live sounds however, the medium does not nec essarily mediate, authenticate, dilute, or ex tend a preexisting social relation. Rather than only view an archive as a space to pre serve former instances of total expression, we should also view them as an opportunity to en gender new forms of it. Rather than use recording technologies to recover or preserve a lost history of the voice, they can be used to actively construct a history of the voiceto create a sonic reality where new social relations can take shape.

Redesigning Internet Audio Archives for Caribbean Poetry

The 2 Cents Movements DIY approach to digi tizing poetry illustrates that a lot can be ac complished by adapting existing platforms and with limited resources however, the underrep resentation of Caribbean poetry online will not be solved solely through social media and the free culture of the Internet. Merely up loading more poems to YouTube will not be enough to overcome the structural biases that silence and drown out Caribbean performance poetry online. As Rick Prelinger establishes, YouTube has become in the eyes of the public, the default online movingimage archive. 31 Yet it lacks many of the defining characteristics of archives that make them valuable, such as a focus on longterm preservation and strictly codified lines of conduct that have been care fully developed through academic practice and intellectual debate. 32 The underrepresentation of Caribbean poetry in Internet audio archives

 $^{^{30}}$ Sterne, The Audible Past, 219, 218, 226.

³¹ Rick Prelinger, The Appearance of Archives, in Pelle Snickars and Patrick Vonderau, eds., The YouTube Reader Stockholm National Library of Sweden, 2009, 269.

is also symptomatic of the global digital divide, which is especially acute for Africadescended populations. 33 However, Curwen Best points out that the flip side to the notion of the digital divide is therefore the formation of strate gic space. It is this strategic space that opens up an area and arena of knowledge about evolving technologies. 34 To take advantage of this strategic space, this section of the article evaluates the standards and practices that have been established by existing Internet audio archives and considers how a Caribbean poetry collection could be organized to realize total expression.

A discussion about archiving poetry recordings would be incomplete without a consideration of the achievements of PennSound. As the leading US collection, it has quickly become the standard for how to create a webbased poetry audio archive. University of Pennsylvania professors Charles Bernstein and Al Fil reis started the collection in 2003 primarily for classroom use. It holds over 45,000 poetry recordings available for free streaming and download. Their files are downloaded roughly four million times a month. 35 For poetry, this number is astounding when one considers the

limited print runs and book sales for contem porary poetry. Although US poets and avant garde aesthetics tend to predominate, the site includes author pages for some prominent Caribbean poets, including Brathwaite, and M. Nourbe Se Philip. They also hold some of the few Bennett recordings available online. The site uses the following archival taxonomies authors, series, anthologies, collections, groups, and classics, which provide the user with a variety of ways to study a poets work. The PennSound Man ifesto is worth examining because it has set the precedent for subsequent Internet poetry collections. They provide the following crite ria for poetry audio It must be free and down loadable It must be MP3 or better It must be singles It must be named It must embed bibli ographic information in the file and It must be indexed. 36 These criteria have proved suc cessful in terms of encouraging widespread use, particularly on college campuses. They archive each poem individually rather than en tire events, because this makes them easier to find, access, and download, and it allows lis teners to create their own playlists. In their own words, they adapt a consumeroriented MP3 file exchange approach for a nonprofit library.³⁷ By embedding bibliographic infor mation in the file and naming each one, they uphold archival standards and ensure that fu ture researchers will have access to informa tion about the context for the recording, some thing a social media platform like YouTube does not always provide. Their straightfor ward interface, which lets users select from an alphabetized list of authors, also erases implicit hierarchies that come from the em phasis on accumulation in social media sites

Charles Bernstein, PennSound Manifesto, PennSound, 2003, http://writing.upenn.edu/pennsound/manifesto.php.

³⁷ Ibid.

where voices are forced to compete with each other for likes and views.

While Penn Sounds open access model holds a lot of potential for Caribbean performance poetry, their prioritizing of free resources may not be as easy to achieve for Caribbean po etry. An extreme example of this free culture ethos is represented by Kenneth Goldsmith, the founder of UBUweb, who for awhile main tained a page on the site called the Wall of Shame, where he would publically condemn any artist who asked for her work to be removed from the site by writing her name on the wall.³⁸ Unlike Goldsmith, PennSound strives to ensure that all of their recordings are cleared for copyright to be distributed free for noncom mercial and educational purposes. 39 While this democratic and anticapitalistic approach may seem appealing for Caribbean poetry, in prac tice it may be more difficult to implement, par ticularly for poets who view performance as a central part of their artistic production. In the manifesto, Bernstein states that the de bates about file sharing in the music indus try do not apply to poetry One of the advan tages of working with poetry sound files is that we dont anticipate a problem with rights. At present and in the conceivable future, there is no profit to be gained by the sale of recorded poetry.40 Yet Caribbean poets such as Muta baruka and Linton Kwesi Johnson built their careers through their affiliation with the reg gae recording industry and make money off of their albums. The 2 Cents Movement offers their recordings for free however, as a group of younger poets, they may be more willing to share their work online to build their reputa tion.

The subject of copyright and fair use for Caribbean performance poetry is a complex issue, which deserves its own treatment in a separate ar ticle. In terms of the current discussion, it offers another example of the persistence of printcentrism in poetry scholarship. The em phasis on free recordings implicitly upholds the idea that the artistic labor of poetry is more worthy of payment when it is printbased. Moreover, it demonstrates how we define po ems as texts rather than as performances. The Poetry Foundations Code for Best Practices in Fair Use For Poetry underscores this point. A group of poets, editors, and publishers met at the Poetry Foundations Harriet Monroe Po etry Institute and collaborated with Ameri can Universitys Center for Social Media and its Washington College of Law in 2011 to cre ate the guide. Although they outline their pur pose as identifying obstacles preventing po etry from coming fully into new media and, where possible, imagining how to remove or mitigate these obstacles, almost none of their examples involve poetry audio.41 Yet for Caribbean poets a major stumbling block to coming fully into new media is a clear set of fair use prac tices for performancebased work. In the Po etry Online section, their examples pertain to the appearance of text on websites. The doc ument concludes with a section on Literary Performance however, it only addresses poets who incorporate poems by other artists into their readings. This document becomes com pletely irrelevant for groups like The 2 Cents Movement who rarely produce text versions of their poems.

This print centrism also extends to the design of audio collections. I agree with Kate Eich horn, who argues that most poetry sound archives both digital and analog have yet to realize the

⁴¹ Code for Best Practices in Fair Use For Poetry Center for Social Media and the Poetry Foundation, 2011, http://www.poetryfoundation.org/foundation/bestpractices.

potential of archiving sound due to the widely held assumption in literary studies that the archive is necessarily a space of writing and, hence, opposed to speech and other performa tive acts. 42 Eichhorn proposes that we need to create a sound archive designed to recover and preserve the embodied, interactive, and present nature of the performed word. 43 In her assessment, archived poetry recordings too often become flat and lifeless artifacts.44 Al though Eichhorn focuses on avantgarde poets, her arguments apply to Caribbean poets who foreground sound as an integral part of the poems meaning. Such work accessible in an archive designed to disrupt our textbased con ceptions of archival knowledge would undoubt edly lead us more assertively into other forms of knowing rather than allow the digital to re consolidate print paradigms.

One notable exception to the underrepresen tation of Anglophone Caribbean poets in In ternet audio collections is The Poetry Archive, supported by the Arts Council of England. This site features more Caribbean poets than most, because the Caribbean Poetry Projecta group of scholars and poets from the Cambridge Uni versity Faculty of Education, the Centre for Commonwealth Education, and the University of the West Indiescollaborated with The Po etry Archive to improve access. Out of 476 po ets, twentythree are from the Caribbean re gion. While this is not a huge percentage, it is considerably more than most sites, and every Caribbean poet page has sound recordings that can be streamed for free or downloaded for a fee of 0.89. The Poetry Archive, like many Internet audio archives, specializes in class room resources. They have a special page for teaching Caribbean poetry with a selection of

sound recordings and A Guide to the Language of Caribbean Poetry. The Caribbean Poetry Projects work with The Poetry Archive demon strates how crossdisciplinary and crossinstitutional collaborations help to break down Anglocentrism.

Yet analyzing the design of the Poetry Archive author pages reveals that we need to do more than add voices to existing archives. As Amy Earhart cautions, for digital recovery projects for writers of color to be successful, we also must theorize the technological with the same rigor as we theorize the content.45 If one com pares the recording of Linton Kwesi Johnson reciting Di Great Insohreckshan on The Poetry Archive with a YouTube recording of him per forming it at an outdoor festival in Venezuela in 2008, the total expression feels much more resonant in the YouTube version than on the Po etry Archive site. 46 I make this comparison to illustrate how the design of the Poetry Archive page mutes the insurrectionary tone of John sons poem about the Brixton Riots, not to demon strate that the YouTube platform is inherently better at representing total expression. Ob viously, the YouTube video allows one to see Johnsons body and facial expressions, which one cannot get from the Poetry Archive audio recording, but it is not as simple as video ver sus audio. Although the sound quality lacks the clarity of the Poetry Archive recording, the uneven audio levels provide a more authen tic experience of what hearing this poem in a large crowd at an outdoor festival would have felt like. The spontaneity of live perfor mances, including sound glitches and background noises, becomes part of what Brathwaite char acterizes as the sonority contrasts of total

expression.⁴⁷ As Eichhorn points out, these in truders are precisely what sound technicians often seek to filter out as they prepare recordings for the archive.⁴⁸ The Poetry Archive ver sion of Di Great Insohreckshan follows the predominant soundediting style for Internet audio archives. Martin Spinelli describes this style as the seamless edit, designed to high light the poets voice and minimize all other distractions, including the recording scene whether live or instudio and the material elements of their production.⁴⁹

In addition to using conventional soundediting, Johnsons author page follows the standard vi sual design that can be found on The Poetry Archive as well as other online poetry collec tions such as PennSound. His page features an author portrait rather than a performance ac tion shot, a biography, and links to individual poem tracks. Beneath the poem title and au thor name, one can click the play button and listen to the recording. The Poetry Archive uses a simple audio player that allows a lis tener to start, pause, and stop the track. John sons author biography explains that his poems on the site were recorded from live performances and come from his CD LKJ A Cappella Live. De spite the claim that the energy of his live recitals gives the recordings a unique electricity, in terspersed with the laughter and applause of

⁴⁹ Martin Spinelli, Analog Echoes A Poetics of Digital Au dio Editing, Object 10 Cyberpoetics 2002 36, UbuWeb Papers, 16 May 2007, http://www.ubu.com/papers/object/06spinelli.pdf. Spinelli criticizes poetry sound editing for being too influenced by traditional radio theory, questioning why most archived poetry record ings present sound as though it were a linear medium by using the seamless, invisible, inaudible edit which dislodges nothing, which interrupts nothing, which is in fact deployed to remove interruption, to remove di gression and to clarify 36.

audiences around Europe, the seamless edit ing of Di Great Insohreckshan allows one to listen to Johnsons entire recitation before re alizing that it is a live performance.50 Once the poem ends, the only audible audience noises are a cough and polite applause that slowly fades out. Rather than convey a unique elec tricity, the cough suggests a subdued audience who tried to remain silent until the end of the performance. The page provides no informa tion about the specifics of the event or who the European audience was, although it sounds like it might be a poetry reading in an acade mic setting. The track certainly holds no trace of a communal dub consciousness. 51 By not clearly identifying the track as a single performance, the archive presents it as the authoritative au dio version. In the lefthand margin, under the heading About the Poem, it lists the themes as social, unrest, race, and Caribbean but pro vides no information about the Brixton Riots.

Derek Furr notes that while online poetry collections devote attention to different aes thetics, what unites them is the idea that hearing a poet voice her own work is crucial to un derstanding the poem. Yet despite the interest in vocalization, collections tend to down play the setting of the poets performance by providing little information about when and where the reading occurred and why this particular event was recorded. While certain sites, such as Penn Sound, make sure that all of the bibliographic info is embedded in the single file with accurate metadata, often all that this provides is the date and physical location of the reading. By divorcing the poem from

its contextual setting, this approach erases the reciprocal relationship between the poet and her audience. Furr proposes that poetry recordings both live and instudio become valu able because when we close listen, we hear not only the sounds of the poem and the poets voicing of them, but also the echoes of previ ous scenes of reading and listening.53 Through webpage design and sound editing, The Poetry Archive downplays the previous audiences of Di Great Insohreckshan so that the online user feels as though she is the only person in the audience. While The 2 Cents Movement illus trates how cinematic approaches can be used to deepen total expression, the Johnson exam ple illustrates the value of preserving the ephemeral qualities of a live performance in a recording to enrich the listening experience. Furr bor rows Charles Bernsteins term close listening to characterize how a user should engage with audio recordings. Based on his experience with Penn Sound Bernstein proposes close listening as an alternative to close reading, where one prioritizes the materiality of sound and the aural experience. 54 Yet, in practice, how much does close listening actually deviate from close reading on Internet audio archives

Annie Murray and Jared Wiercinski, cura tors of SpokenWeb, a collection of recordings of a Montreal poetry reading series from 1966 to 1977, point out that while most Internet au dio archives make listening the focus, their structure makes them multimodal. Accordingly, they stress that the visual elements of online poetry archives need careful consideration. They explore what kinds of site navigation, au dio visualization, design elements and functionalities could be offered by a Webbased spoken word interface, and how these might enhance the listening process and, ultimately, the scholarly endeavor. 55 Because very little

⁵³ Ibid., 149.

⁵⁴ See Bernstein, Close Listening, 326.

scholarship exists on how people engage with sounded poems, they acknowledge that their suggestions for a sound archive recipe that other cultural heritage institutions can fol low are based on established reading practices.56 They make some helpful suggestions, includ ing using a waveform display for sound visual ization, and providing listeners with a media player that allows them more control over the playback. They also suggest incorporating any available images and videos of the perfor mance event, much like The 2 Cents Movements photo documentation on Twitter and Facebook. However, other suggestions such as tethering audio playback with a written transcript keep the primary focus on reading rather than lis tening.57 For example, on the Poetry Archive site, beneath the link to play Di Great Insohreck shan, one can also click on a Read this Poem link. This encourages scholars to engage in what is, for many, the more familiar interpre tive practice rather than to develop new modes of analysis based on sound. In digital archives, Bernstein suggests that poems, set adrift from their visual grounding in alphabetic texts, might begin to resemble the songs from which, for so long, they have been divided.58 However,

⁵⁷ For a summary of their specific suggestions for visual design, see Murray and Wiercinski, Looking at Archival Sound.

⁵⁸ Charles Bernstein, Making Audio Visible The Lessons of Visual Language for the Textualization of Sound, Textual Practice 23, no. 6 2009 966, doi10.1080/09502360903361550.

to achieve this we need to 1 be wary of a one sizefitsall approach, and 2 carefully design visual elements to encourage sonic engagement rather than to reify a visual economy of text. Such a divide between song and poem has never existed for Anglophone Caribbean performance poets, yet colonial legacies continue to dictate that we read rather than listen to this work.

Even when one is only listening, Internet au dio archives often recreate the feeling of read ing alone. Clicking on the link and listening to the poem while one looks at the author por trait similar to the style found on book jack ets mimics the experience of solitary reading, where one feels in private conversation with the author. Simple audio players that have only a linear time lapse bar rather than a more complex waveform display encourage the eyes to move from right to left, as they do in the act of reading. When a poem is presented as a decontextualized single track, a listener is en couraged to adopt a new critical approach and treat the poem as a selfcontained object. Lis tening, like reading, becomes an isolated, in dividualistic expression rather than a commu nal endeavor. 59 Sound reproduction technolo gies have also encouraged our hearing to be come more individualistic. Using headphones as his example, Sterne argues that such devices encourage listening to be more orientated to ward constructs of private space and private property, which encourages sound to become a commodity.60

In contrast, The 2 Cents Movement recreates the communal experience of listening to a poem, which is a key part of total expression. Their photo tweets and poetry videos make online members a part of their participatory audience. We have much work to do to figure out

⁵⁹ Brathwaite, History of the Voice, 18.

⁶⁰ Sterne, The Audible Past, 24.

how to build Internet audio archives that recre ate this communal experience of listening. Everythin including sound editing, interface, database design, navigation system and copyright issues needs careful consideration to realize the digital potential of total expression. To embark on this work, it is crucial that we turn to the poets themselves and build on their education legacies.

So much of the history of the voice has al ready been lost, or muted, by the ongoing colo nial bias toward nation language, as well as limited resources and funding. Caribbean po etry recordings that survive buried in dusty boxes in attics and library storage rooms sit silently waiting for new audiences to return to them the noise and sounds that the maker makes. Since these reeltoreel tapes, cassettes, eightracks, CDs, and LPs are fragile media, threatened by technological obsolescence and sometimes the tropical Caribbean climate, we must make digitizing this vital record of Caribbean poetry history a priority.
