Digitizing the Sound Explosions of Anglophone Caribbean Performance Poetry

font cmmib

Janet Neigh

The Internet offers new performance plat forms for Caribbean poets who prioritize oral $expression. \ One \ group \ realizing \ this \ potential$ is the youthled artist collective The Cents Move ment, based out of Trinidad and Tobago, who circulate their video poems on social network ing sites. Through their DIY approach, they are building a broader youth audience for their work. More generally, Caribbean poets are of ten underrepresented in online poetry resources, particularly in institution based Internet au dio archives. This article uses The Cents Move ment as a preliminary model to understand how Internet audio archives can be redesigned to amplify the total expression of Caribbean poetry. Admittedly, The Cents Movement of fers a partial solution to a much bigger problem however, this article demonstrates the value of examining poets engagements with digital tech nologies to develop better archival standards and practices in sync with the politics of the work.

Introduction

If Louise Bennett, the prolific Jamaican artist, were still alive and performing today, how would the Internet fit into her creative practice Would she post poetry recordings on Facebook Would chil dren play with a Miss Lou app Would Aunty Roachy $deliverwisdom\ via\ Twitter\ Since\ she\ embraced\ emerg$ ing technologies to teach her audience about the value of the Jamaican language, social media likely would have played a prominent role in her educa tion activism. She turned to performance early in her career to build an inclusive audience, and her media projects for the Jamaica Broadcasting $Corporation her childrens \, television \, show \, Ring \, Ding$ and her radio program Miss Lous Views gave her an expanded terrain to develop her callandresponse poetics. Unfortunately, searching for Louise Ben nett online today yields few actual sound record ings of her poetry. Bennetts underrepresentation onlineor, more aptly, her silence, since her words can be found but rarely her voiceis characteristic of Caribbean poetry more generally. This article stems from concern about who has the power to de fine poetry in virtual spaces and whose voices re ceive airtime. As Kamau Brathwaite establishes in his groundbreaking lecture History of the Voice, Anglophone Caribbean poetry should be celebrated for its sound explosions, yet it has remained rela tively quiet online.

Internet audio archives for poetry have flourished in recent years. Websites such as PennSound, The Poetry Archive, the Poetry Foundation, the Acad emy of American Poets, and UbuWeb have provided excellent resources for contemporary poetics. These twenty first century openaccess collections of fer both live and studio recordings, round table discussions of poetry, lectures, and taped interviews. While these digital platforms promise democratization, they often repeat the exclusions of print archives.

Edward Kamau Brathwaite, History of the Voice The Devel opment of Nation Language in Anglophone Caribbean Poetry London New Beacon Books, , .

Many of these collections, which now determine the content of poetry syllabi in university classrooms, reinforce the United States as the dominant center of Anglophone poetry in the Americas.http//www .upenn.edu/pennnews/news/pennsoundtransformshow poetry taught world over. For example, the Poetry Foundation has, author pages, almost half of which are devoted to US poets. The site features only eleven poets from the Caribbean region, exclud ing many major voices from the region, including Louise Bennett. Of the eleven Caribbean poet pages, none include audio poems and only seven of them include actual poetry texts the other four just fea ture short author bios. Not only are Caribbean po ets underrepresented in these curated collections but their online presence is often sparse, limited to $random\ YouTube\ videos.$

Despite their underrepresentation in webbased audio collections, many contemporary Caribbean performance poets have embraced digital technolo gies to build their audiences. These new digital poetries offer a solution to what Laurence A. Breiner has characterized as the halflife of Caribbean performance poems. According to him, readers unable to attend a poems live recitation are always at a disadvantage, because things like tone, gesture, and the poets relationship with her audience also determine meaning. In terms of distribution, digitized poetry recordings, unhindered by shipping fees and

For a discussion of race in digital canons, see Amy E. Earhart, Can Information be Unfettered Race and the New Digital Humanities Canon, in Mathew K. Gold, ed., Debates in the Digital Humanities Minneapolis University of Minnesota Press, Open Access Edition, http://dhdebates.gc.cuny.edu. Earhart urges that we need to examine the canon that we, as digital humanists, are constructing, a canon that skews toward tra ditional texts and excludes crucial work by women, people of color, and the GLBTQ community.

Laurence A. Breiner, The HalfLife of Performance Poetry, Journal of West Indian Literature, no. .

trade tariffs, surpass print books in their interna tional portability, making them more accessible to Caribbean diasporic communities.

Figure Cents Movement Poet

 $This\ article\ examines\ one\ of\ the\ best\ examples\ of\ in$ novative digital poetry in the Caribbean the youth led artist collective The Cents Movement, based out of Trinidad and Tobago, who use social networking sites to circulate their video poems. Students at the University of the Southern Caribbean started the movement in, and their activities have strength ened youth enthusiasm for spokenword poetry. Some of their activities include islandwide school tours, openmic nights, slam contests, television and ra dio broadcasts, video production of poems, and stu dent poetry workshops. They present themselves as a movement to align their poetry with social change. Their digital recordings become modes of produc tion, publication, distribution, preservation, andcommunity activism. Their populist approach builds on the vernacular pedagogical dynamics of perfor mance established by figures like Louise Bennett. By using these technologies to integrate creative and political praxes, The Cents Movement realizes

Brathwaites theory of nation language and his ar gument that sound reproduction technologies can be used to reinvigorate Afrocentric oral traditions.

Brathwaite identifies how nation language po ets challenge the way that paper records were used $to\ discredit\ oral\ ways\ of\ knowing\ and\ uphold\ insti$ tutional power during colonization. When a dub poet like Linton Kwesi Johnson recites definitive $works\ such\ as\ Reggae\ Sounds, lines\ such\ as\ footdrop$ $find\ drum, blood\ story\ /\ bass\ history\ is\ a\ moving\ /$ is a hurting black story attack printcentric forms of knowledge. He builds on a history of Caribbean people using performance to circumvent the print archive to produce, record, and transmit knowledge through embodied acts. Such knowledge depends on the interaction between the performer and her au dience. The format of Bennetts Ring Ding, where she would invite children from the studio audience to join her on stage to recite poetry with her, exem plifies this well. Such communal pedagogies also extend to adult audiences. For example, Oku On $uora\ defines\ the\ goal\ of\ dub\ poetry\ as\ consciousness$ $raising\ It\ also\ mean\ to\ dub\ out\ the\ isms\ and\ schisms$ and to dub consciousness into the peopledem head. Performance creates what Brathwaite character izes as total expression, engendering a space for collective, politicized vernacular consciousness to take shape

The other thing about nation language is that it is part of what may be called total expression. . . . Reading is an isolated, individualistic expression. The oral tradition on the other hand demands not

Brathwaite, History of the Voice, .

Here I draw on Diana Taylors analysis of what she calls the repertoire to characterize how performance acts create cultural memory in the Americas. See Diana Taylor, The Archive and the Repertoire Performing Cultural Memory in the Americas Durham, NC Duke University Press,.

Quoted in Mervyn Morris, Is English We Speaking and Other Essays Kingston Ian Randle Publishers, , .

only the griot but the audience to complete the community the noise and sounds that the maker makes are responded to by the audience and are returned to him. Hence we have the creation of a continuum where meaning truly resides.

Although Brathwaite seems to be arguing here that the full experience of the sonic continuum de pends on live interaction, he actually emphasizes $the\ opposite.\ A\ central\ point\ of\ his\ text,\ originally$ titled an electronic lecture for his Harvard pre sentation, harnesses the potential of sound repro duction technologies to create new pathways for to tal expression. For him, they intensify the detona tions within Caribbean soundpoetry that have im ploded us into new shapes and consciousness of our selves. Brathwaites combustion metaphors of det onations and explosions reveal his prioritizing of electronic sound. As Jonathan Sterne establishes, $All\ soundreproduction\ technologies\ work\ through$ the use of transducers that convert acoustic waves into electronic impulses. Brathwaite suggests that $these\ energy\ conversions\ amplify\ total\ expression$ rather than weaken it, which The Cents Movement substantiates.

So much scholarship focuses on written documents and techniques from the past, yet many digital hu manists are early adopters. They embrace the un finished, they invite collaboration, they move us off the page, and they aim to build things for the future. Inspired by this approach, this article uses The Cents Movement as a preliminary model to understand how Internet audio archives can be re designed to amplify the total expression of Caribbean poetry. Admittedly, The Cents Movement offers an incomplete solution to a much larger problem however, I argue that we need to begin by examin ing poets engagements with digital technologies to develop better archival standards and practices in

 $Brathwaite, \, History \, of \, the \, Voice, \, \, italics \, in \, original. \, Ibid., \, .$

Jonathan Sterne, The Audible Past Cultural Origins of Sound Reproduction Durham, NC Duke University Press, , .

sync with the politics of the work. In this collabora tive spirit, I also invite readers to click on the links as they read this article, to immerse themselves in whats already online, and to think about how we can build on this virtual world of Caribbean poetics.

Part of what makes Brathwaites History of the $Voice\ an\ important\ catalyst\ for\ building\ digital\ archives$ is that he avoids the tendency in oral scholarship to fixate on the live event. For example, Hugh Hodges $stresses\ the\ difficulty\ of\ studying\ performance\ po$ etry, lamenting that we typically examine only the $textualized\ trace\ of\ it.\ He\ considers\ sound\ and\ video$ recordings as texts, because he argues that the total expression of the live event does not get captured on them. Similarly, Peggy Phelan claims that what she $calls\ liveness\ disappears\ in\ recordings\ of\ a\ perfor$ mance. As Sterne puts it, this attitude upholds face to face communication and bodily presence as the yardsticks by which to measure all communicative activity and defines sound reproduction negatively, $as\ negating\ or\ modifying\ an\ undamaged\ interper$ sonal or facetoface copresence. Brathwaite takes a more innovative approach to sound reproduction technologies by highlighting their capacity to chal lenge printcentric aesthetics. The Cents Movement $demonstrates\ how\ digital\ technologies\ provide\ even$ more opportunities for this through their use of mu sic videography and microblogging. However, what $Brathwaite\ envisioned\ over\ years\ ago\ through\ res$ onating tapes, eight tracks, and LPs has yet to be

Hugh Hodges, Poetry and Overturned Cars Why Performance Poetry Cant Be Studied, and Why We Should Study It Any way, in Susan Gingell and Wendy Roy, eds., Listening Up, Writing Down, and Looking Beyond Interfaces of the Oral, Written, and Visual Waterloo, ON Wilfrid Laurier University Press,,.

As Phelan describes, Performances only life is in the present. Performance cannot be saved, recorded, documented, or oth erwise participate in the circulation of representations of representations once it does so, it becomes something other than performance. Peggy Phelan, Unmarked The Politics of Performance New York Routledge,,.

Sterne, The Audible Past,.

fully realized in the broader terrain of our research methodologies and poetry resources.

Critical approaches to performance poetry have been slow to develop because of the Western assump $tion\ that\ the\ text\ of\ a\ poemthat\ is,\ the\ written\ document$ $is\ primary\ and\ that\ the\ recitation\ or\ performance$ of a poem by the poet is secondary and fundamen tally inconsequential to the poem itself. While the digital should free us from our obsession with a textbased idiom in literary studies, it has yet to $do\ so.http//www.digitalhumanities.org/dhq/$ vol///.html. As this article demonstrates, even the designs of most online poetry audio collections $still\ privilege\ the\ methodology\ of\ textual\ close\ read$ ing rather than encourage us to develop new sound $based\ methods\ of\ analysis.\ In\ a\ similar\ vein,\ recent$ efforts to build Caribbean digital archives have fo cused on converting print documents and have not engaged as much with sound media. Resources and funding certainly drive this, since print materials are easier and cheaper to digitize. Yet given the oral dimensions of Caribbean cultures, we must ad $dress\ how\ to\ represent\ and\ archive\ performance\ to$ overcome the structural biases of print archives.

Brathwaite, History of the Voice,.

Charles Bernstein, ed., Close Listening Poetry and the Performed Word New York Oxford University Press,,.

For a discussion about the neglect of sound analysis in digital literary studies, see Tanya Clement, David Tcheng, Loretta Auvil, Boris Capitanu, and Megan Monroe, Sounding for Mean ing Using Theories of Knowledge Representation to Analyze Aural Patterns in Texts, Digital Humanities Quarterly, no.

Although I do not have the space in this article to explore their work, studying the standards and practices developed by mu sic historians for online collections such as the Naxos Music Library would be another fruitful line of inquiry to help lit erary scholars move beyond textbased approaches.

While there are Caribbean sound archives, such as Radio Haiti, in Caribbean literary studies print archiving is much more prevalent. For example, major collections, such as the Digital Library of the Caribbean, while excellent, primarily hold literary materials converted from print documents.

$Creating\ Digital\ Griots\ The\ Cents\ Movement$

Figure Audience Interaction

Scrolling through The Cents Movements Facebook page reveals a vibrant online poetry community. As of December, they have more than, followers, and their page includes announcements about upcom ing performances, photographs of performances, political news updates, links to livestream their events, and video poems. Its campus origins ex $plain\ why\ Facebook,\ a\ social\ networking\ site\ designed$ for college students, has played a central role in the development of the movement. The founder, Jean Claude Cournand, an undergraduate at the $time.\ sought\ to\ build\ a\ stronger\ intellectual\ youth$ culture to invite youth to put in their two cents by expressing their views on current issues ranging $from\ marijuana\ legislation\ to\ homophobia\ through$ spokenword poetry. In an interview, he explained that they chose to go into the digital habitat rather than trying to reach people through events alone,

in order to attract a youth audience.http//www .guardian.co.tt/entertainment//notafraidputtheirquote cents. Their bestknown projects are the In tercol and Verses national slam competitions, held annually as part of the Bocas Lit Festival Verses was recently renamed the First Citizens National $Poetry\ Slam.\ The\ two\ different\ slamsIntercol\ fea$ tures high school teams, and Verses features promi nent poets who compete individually reflect their mentorship structure. The winner of the Intercol slam, Michael Logie, got to pick a Cents Movement poet as a mentor to work with him for a year to help $him\ develop\ his\ poetry.http//www.guardian.co.tt/$ lifestyle//logietopsschoolsspokenwordquote intercol. The Cents Movement has also collabo rated with the Trinidad and Tobago Radio Network on the Free Speech Project, where young artists re cite their poems weekly on the radio. These poems are also produced as videos and archived on the net works YouTube channel. The majority of the move ments activities are coordinated and advertised on line, and major events like the slam contests can be livestreamed. They exist solely through freely accessible sites and do not have their own server or domain name, which suggests that a lack of re sources does not need to be an obstacle to building an online presence for Caribbean poetry. In addi tion to reaching youth in Trinidad and Tobago, they have gained an international following by circulat ing their poetry on social media.

Their Twitter and Facebook updates for their Courts Bocas Speak Out Tour of more than fifty secondary schools demonstrates their use of these platforms to enhance audience interaction. During this tour, some of the nations best performance poets men tored high school students as they wrote and per formed their own works through performances and workshops. These school visits provided a way for The Cents Movement to promote the Intercol slam

 $Quoted\ in\ Bobielee\ Dixon,\ Not\ afraid\ to\ put\ in\ their\ cents,\\ Trinidad\ and\ Tobago\ Guardian,\ July\ ,$

Figure Poet performer

Facebook followers become situated in the contin uum of total expressionin the reciprocal exchange between performer and audience.

High school students who attended a Cents Move ment performance at their own school could then follow them on Twitter and Facebook and connect these images to their own participation in the live event. The photos and the movement as a whole downplay individual author celebrity in favor of building a student focused collectivity. The Cents Movement uses Twitter and Facebook to create a con stancy of presence to link together different high school communities in Trinidad and Tobago.

Although these social media platforms governed by the commercial needs of USbased multinationals certainly hold limitations, rhetoric scholar Kevin Adonis Browne stresses the possibility for subver sive adaptation. Examining Caribbean Internet users chatting, blogging, and videosharing practices, he illustrates how users adapt everyday vernacular practices to assert their presence in digital public

Dhiraj Murthy, Twitter Social Communication in the Twit ter Age Cambridge, UK Polity Press, , .

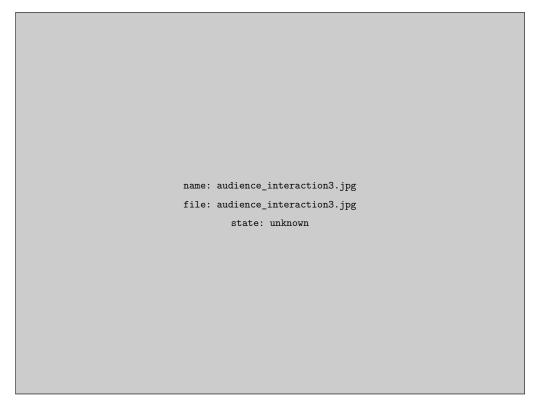

Figure Audience interaction

spaces that often render them invisible. While his argument relates to individuals everyday encoun ters online rather than largescale digital projects, the parallels he establishes between a carnivale que imperative and the Internet lend insight into The Cents Movements adaptation of social media to expand on the power of total expression in online environments. Rather than view Caribbean folk cul tures in opposition to digital forms, Browne views the inventiveness of both as part of what makes them compatible. He demonstrates how communal vernacular practices easily translate to an online environment because they emerge out of a history of adaptability necessary for those who have had

Kevin Adonis Browne, Tropic Tendencies Rhetoric, Popular Culture, and the Anglophone Caribbean Pittsburgh University of Pittsburgh Press,,.

to find a way or make one when none seemed avail able. For example, in the colonial era, musicians in vented steel pan drumming to get around the ban on using actual drums and managed to make noise in a colonial environment that aimed to silence them. Corporate social media platforms also curtail cre ative expression through their circumscribed structures. Such restrictions often reinforce the major ity voice, yet Facebook and Twitter have also proven themselves useful for the growth of subcultures and movements.

Media scholars have identified how Facebooks in terface encourages users to adopt neoliberal values. $The\ anthropologist\ Alex\ Fattal\ draws\ a\ connection$ between a users desire to gain as many likes and friends as possible and Facebooks corporate desire to become the most dominant social network in the world, characterizing this as the unspoken logic of accumulation and curiosity that undergirds the $platform.\ To\ what\ extent\ can\ this\ logic\ of\ accumu$ lation and curiosity, which sounds eerily similar to older imperial impulses, be disrupted By using social media to augment their performance events, The Cents Movement intercepts this logic of accu mulation by bringing users into the dynamic of to tal expression. While scholars often critique Face book for weakening facetoface sociality, The Cents Movement reveals how it can be used to deepen so $cial\ connections.$

Through social media, they also make their per formances part of everyday life. People browse Face book as they ride the bus to work, or as they wait in

line at the grocery store. The Cents Movement of ten depicts the performance dynamics of such quo $tidian\ spaces\ in\ their\ studioproduced\ video\ poems$ available on YouTube. For example, their most pop ular video poem Maxi Man Tracking School Gyal originally titled Yankees Gone, by Crystal Skeete, takes place on a Curepe street and on a bus. Skeete addresses her concern about adult males sexually preying on underage schoolgirls by writing a poem in the voice of a teenage girl who refuses their ad vances. Similar to earlier women poets like Miss Lou and Jean Binta Breeze, she uses the dramatic monologue to give voice to women who are denied respect in the public sphere. Through social media her video becomes even more impactful because a viewer might be in that particular social space as she watches the poem and even be witnessing what Skeete describes. This restores an important as $pect\ of\ Caribbean\ oral\ traditions, where\ yard\ perfor$ mances blend into everyday practices rather than become isolated special events. Miss Lou had a simi lar aim in her market women poems, yet her ability to connect her audience to her settings was often re strained by the artifice of the theater stage. By cre ating a tangible bond between their reallife users and the mediated voices in their poems, The Cents $Movement\ invites\ users\ to\ do\ more\ than\ merely\ like$ their status updates and continue scrolling.

In addition to microblogging their performances, The Cents Movements video poems, like Skeetes Maxi Man, demonstrate how audiovisual recording technologies can be used to enhance the communal dynamic of total expression. Their videos challenge the idea that poetry depends on print publication, since many of their wellknown poems are available only in this format. By getting us off the page, their videography expands the possibilities for how we might edit and archive performance poetry. Released in , Skeetes video went viral on social media and received more than , views on YouTube.

 $Crystal\ Skeete,\ Maxi\ Man\ Tracking\ School\ Gyal,\ YouTube\ video,\ .,\ posted\ by\ The\ Cents\ Movement,\ June\ ,\ https://www.youtube.com/war$

Figure Embedded video. Youtube url https://youtu.be/OAeLoPylU

Her poem exemplifies the Cents Movements ap proach, in that she initially attended one of their workshops as a medical student and she is now a leading poet in the movement. She won the Verses poetry slam with her performance of this poem how ever, the popular version on The Cents Movements $You Tube\ channel\ is\ a\ studio\ recording\ made\ by\ Beat$ Oven Productions with videography by Denithy. Rather than aim to recreate the experience of the live per formance event, the video invites a viewer to feel included in the street scene being depicted. Through their synthesis of the dramatic monologue form and the music video genre, Skeete and the Cents Movement team cultivate a sense of audience con nection and encourage dialogue beyond the space of the poem.

Skeete dresses in a government school uniform to play her character in the video. Her embodiment of the character creates a dialogic relationship be tween her persona and her words because her recita tion critiques the behavior that she acts out. The dramatic monologues implied addressee is another high school girl who is swayed by a maxi mans ad vances. The speaker warns her that these free rides are going to end in horror / trust me / with that

Figure Maxi man cast

ninemonth sentence things does go sour. Skeetes conversational style, enhanced by the video editing and camera angles, encourage the viewer to feel as though Skeete is speaking directly to her. Stand ing in the middle of the street, Skeete begins with the lines, Posing on every street corner / this is the resurrection of Jean and Dinah... No Yankees here / only maxi man conductor. Referencing Mighty Sparrows calypso hit Jean and Dinah, about how the presence of a World War II US army base led to prostitution in Trinidad, she draws attention to how girls getting free bus rides from maxi men for $sexual\ favors\ recreates\ a\ similar\ dynamic.\ Through$ an intergenerational call and response, she situ ates her poem in the Trinidadian oral tradition. $Skeetes\ poem\ exemplifies\ how\ The\ Cents\ Movement$ $aims\ to\ cultivate\ a\ socially\ conscious\ form\ of\ learn$ ing that values vernacular language and knowledge.

Skeete, Maxi Man hereafter cited in text. Since I transcribed the quotations from a recording, any inaccuracies are mine.

Similar to music videos, Skeetes recitation alter nates between a voiceover and her character speak ing onscreen. By playing with the boundaries be tween diegetic and nondiegetic sound, the editing capitalizes on sounds permeability, encouraging her virtual audience to feel a closer connection to her words. Skeetes voice extends beyond the bound aries of the video and infiltrates the listening space, collapsing the distance between the onscreen per formance and the audiences experience of it, especially if they happen to be in a similar setting.

In the narrative that unfolds, the camera angles accentuate Skeetes embodied performance. While conventional music videos often sexually objectify womens bodies, the jump cuts between medium shots, medium long shots, and closeups often from a slight low angle emphasize Skeetes power as she drama tizes her characters selfactualization and encour ages other girls to do the same. Skeetes words com bined with the camera work challenge the male gaze $to\ create\ a\ virtual\ space\ of\ female\ community.\ This$ reaches its peak when the speaker sits in the back of the van reciting her critique and a reverse shot depicts the maxi man gazing at her in the rearview mirror. His gaze is literally reflected back at him, while the speaker verbally refuses his objectifica tion. In the middle of the van, a girl flirts with an other maxi man. Throughout the poem, the speaker seems to completely condemn this behavior however, the poem ends with a surprise twist. As she gets out of the maxi mans van, she tells the audience, This $brownskinned\ gyal\ /\ going\ home\ and\ mind\ she\ child,$ indicating that her advice is based on her own mis takes with a maxi man Skeete. This surprise ending builds the speakers authority not by separating her from her community but by underscoring her partic ipation in it and encourages schoolgirls watching the poem to trust her advice.

In the live performance of Maxi Man Tracking School Gyal, Skeetes critique of sexual harassment is likely powerful however, the video format allows a viewer to experience with greater clarity the em bodied experience of resisting sexual harassment on the street. For female viewers who went through something similar, the recreation of the scene and its provocative ending deepens their identification with the speaker. Like a griot, Skeete speaks for a community of young girls, or rather speaks with them, as her performance encourages them to bring their experiences into their interpretation of the poem.

Unlike many poetry recordings available online, which are taped at live events, The Cents Movement engages technologies as part of the artistic compo sition of the poem through their studioproduced po ems. By borrowing from music videography, they invite us to see performance archives as something $more\ expansive\ than\ as\ a\ place\ to\ simply\ store\ copies$ of original live events. This moves us move beyond $what\ Sterne\ characterizes\ as\ the\ preoccupation\ with$ fidelity, which advertisers established early on in sound reproduction history. Sterne reveals how sound fidelity is a story that we tell ourselves to sta ple separate sonic realities together. It maintains the illusion of reproduced sound as a mediation of live sounds however, the medium does not neces sarily mediate, authenticate, dilute, or extend a preexisting social relation. Rather than only view an archive as a space to preserve former instances of total expression, we should also view them as an opportunity to engender new forms of it. Rather than use recording technologies to recover or pre serve a lost history of the voice, they can be used to actively construct a history of the voiceto create a sonic reality where new social relations can take shape.

Redesigning Internet Audio Archives for Caribbean Poetry

The Cents Movements DIY approach to digitizing poetry illustrates that a lot can be accomplished by adapting existing platforms and with limited re sources however, the underrepresentation of Caribbean poetry online will not be solved solely through social media and the free culture of the Internet. Merely

Sterne, The Audible Past, , , .

uploading more poems to YouTube will not be enough $to\ overcome\ the\ structural\ biases\ that\ silence\ and$ drown out Caribbean performance poetry online. As Rick Prelinger establishes, YouTube has become in the eyes of the public, the default online moving image archive. Yet it lacks many of the defining characteristics of archives that make them valu able, such as a focus on longterm preservation and strictly codified lines of conduct that have been carefully developed through academic practice and $intellectual\ debate.\ The\ under representation\ of\ Caribbean$ poetry in Internet audio archives is also sympto $matic\ of\ the\ global\ digital\ divide,\ which\ is\ especiall\ y$ acute for Africadescended populations. However, Curwen Best points out that the flip side to the notion of the digital divide is therefore the forma tion of strategic space. It is this strategic space that opens up an area and arena of knowledge about $evolving\ technologies.\ To\ take\ advantage\ of\ this\ strate$ gic space, this section of the article evaluates the standards and practices that have been established by existing Internet audio archives and considers how a Caribbean poetry collection could be organized to realize total expression.

A discussion about archiving poetry recordings would be incomplete without a consideration of the achievements of PennSound. As the leading US collection, it has quickly become the standard for how to create a webbased poetry audio archive. University of Pennsylvania professors Charles Bernstein

Rick Prelinger, The Appearance of Archives, in Pelle Snickars and Patrick Vonderau, eds., The YouTube Reader Stockholm National Library of Sweden, , .

and Al Filreis started the collection in primarily for classroom use. It holds over, poetry recordings available for free streaming and download. Their files are downloaded roughly four million times a month.http//www.upenn.edu/pennnews/current/ /features/pennsrichpoetrylegacy. For poetry, this number is astounding when one considers the limited print runs and book sales for contemporary $poetry. \ Although \ US \ poets \ and \ avantgarde \ aesthet$ ics tend to predominate, the site includes author pages for some prominent Caribbean poets, includ ing Brathwaite, and M. NourbeSe Philip. They also hold some of the few Bennett recordings available online. The site uses the following archival tax onomies authors, series, anthologies, collections, groups, and classics, which provide the user with a variety of ways to study a poets work. The PennSound Manifesto is worth examining because it has set the precedent for subsequent Internet poetry col lections. They provide the following criteria for poetry audio It must be free and downloadable It must be MP or better It must be singles It must be named It must embed bibliographic information in the file and It must be indexed.http//writing .upenn.edu/pennsound/manifesto.php. These criteria have proved successful in terms of encour aging widespread use, particularly on college cam puses. They archive each poem individually rather than entire events, because this makes them eas ier to find, access, and download, and it allows lis teners to create their own playlists. In their own words, they adapt a consumeroriented MP file ex change approach for a nonprofit library. By embed ding bibliographic information in the file and nam ing each one, they uphold archival standards and ensure that future researchers will have access to information about the context for the recording, something a social media platform like YouTube

 $Tanya\ Barrientos, Penns\ Rich\ Poetry\ Legacy, Penn\ Current, \\ May\ ,$

 $Charles\ Bernstein,\ PennSound\ Manifesto,\ PennSound,\ ,\\ Ibid.$

does not always provide. Their straightforward in terface, which lets users select from an alphabet ized list of authors, also erases implicit hierarchies that come from the emphasis on accumulation in social media sites where voices are forced to compete with each other for likes and views.

While Penn Sounds open access model holds a lot of potential for Caribbean performance poetry, their prioritizing of free resources may not be as easy to achieve for Caribbean poetry. An extreme exam ple of this free culture ethos is represented by Ken neth Goldsmith, the founder of UBUweb, who for awhile maintained a page on the site called the Wall of Shame, where he would publically condemn any artist who asked for her work to be removed from the site by writing her name on the wall. Unlike Gold smith, Penn Sound strives to ensure that all of theirrecordings are cleared for copyright to be distrib uted free for noncommercial and educational pur poses. While this democratic and anticapitalistic approach may seem appealing for Caribbean poetry, in practice it may be more difficult to implement, particularly for poets who view performance as a central part of their artistic production. In the manifesto, Bernstein states that the debates about file sharing in the music industry do not apply to poetry One of the advantages of working with po etry sound files is that we dont anticipate a prob lem with rights. At present and in the conceivable future, there is no profit to be gained by the sale of recorded poetry. Yet Caribbean poets such as Mu tabaruka and Linton Kwesi Johnson built their ca reers through their affiliation with the reggae recording industry and make money off of their albums. The Cents Movement offers their recordings for free however, as a group of younger poets, they may be more willing to share their work online to build $their\ reputation.$

 $The \ subject \ of \ copyright \ and \ fair \ use \ for \ Caribbean$ performance poetry is a complex issue, which de serves its own treatment in a separate article. In terms of the current discussion, it offers another example of the persistence of printcentrism in po etry scholarship. The emphasis on free recordings implicitly upholds the idea that the artistic labor of poetry is more worthy of payment when it is print based. Moreover, it demonstrates how we define poems as texts rather than as performances. The Poetry Foundations Code for Best Practices in Fair Use For Poetry underscores this point. A group of po ets, editors, and publishers met at the Poetry Foun dations Harriet Monroe Poetry Institute and col laborated with American Universitys Center for Social Media and its Washington College of Law in to create the guide. Although they outline their purpose as identifying obstacles preventing poetry from coming fully into new media and, where pos sible, imagining how to remove or mitigate these obstacles, almost none of their examples involve poetry audio. Yet for Caribbean poets a major stum bling block to coming fully into new media is a clear set of fair use practices for performancebased work. In the Poetry Online section, their examples per tain to the appearance of text on websites. The doc ument concludes with a section on Literary Perfor mance however, it only addresses poets who incorpo $rate\ poems\ by\ other\ artists\ into\ their\ readings.\ This$ document becomes completely irrelevant for groups like The Cents Movement who rarely produce text versions of their poems.

This printcentrism also extends to the design of audio collections. I agree with Kate Eichhorn, who argues that most poetry sound archives both digital and analog have yet to realize the potential of archiving sound due to the widely held assumption in literary studies that the archive is necessarily a space of writing and, hence, opposed to speech and other performative acts. Eichhorn proposes that

Code for Best Practices in Fair Use For Poetry Center for So cial Media and the Poetry Foundation, http://www.poetryfoundation.org/foundation/bestpractices.

we need to create a sound archive designed to re cover and preserve the embodied, interactive, and present nature of the performed word. In her assess ment, archived poetry recordings too often become flat and lifeless artifacts. Although Eichhorn fo cuses on avantgarde poets, her arguments apply to Caribbean poets who foreground sound as an inte gral part of the poems meaning. Such work accessible in an archive designed to disrupt our textbased conceptions of archival knowledge would undoubt edly lead us more assertively into other forms of knowing rather than allow the digital to reconsolidate print paradigms.

 $One\ notable\ exception\ to\ the\ under representation$ of Anglophone Caribbean poets in Internet audio collections is The Poetry Archive, supported by the Arts Council of England. This site features more Caribbean poets than most, because the Caribbean Poetry Projecta group of scholars and poets from the Cambridge University Faculty of Education, the Centre for Commonwealth Education, and the Uni versity of the West Indiescollaborated with The Po etry Archive to improve access. Out of poets, twenty three are from the Caribbean region. While this is not a huge percentage, it is considerably more than most sites, and every Caribbean poet page has sound recordings that can be streamed for free or down loaded for a fee of .. The Poetry Archive, like many Internet audio archives, specializes in classroom resources. They have a special page for teaching Caribbean poetry with a selection of sound record ings and A Guide to the Language of Caribbean Po etry. The Caribbean Poetry Projects work with The $Poetry\ Archive\ demonstrates\ how\ cross disciplinary$ $and\ crossinstitutional\ collaborations\ help\ to\ break$ down Anglocentrism.

Yet analyzing the design of the Poetry Archive author pages reveals that we need to do more than add voices to existing archives. As Amy Earhart

Ibid.,.

cautions, for digital recovery projects for writers of color to be successful, we also must theorize the $technological\ with\ the\ same\ rigor\ as\ we\ theorize\ the$ content. If one compares the recording of Linton Kwesi Johnson reciting Di Great Insohreckshan on The Poetry Archive with a YouTube recording of him performing it at an outdoor festival in Venezuela in, the total expression feels much more resonant in the YouTube version than on the Poetry Archive site. I make this comparison to illustrate how the de sign of the Poetry Archive page mutes the insurrec $tionary \, tone \, of \, Johnsons \, poem \, about \, the \, Brixton \, Ri$ ots, not to demonstrate that the YouTube platform is inherently better at representing total expres sion. Obviously, the YouTube video allows one to see Johnsons body and facial expressions, which one cannot get from the Poetry Archive audio record ing, but it is not as simple as video versus audio. Although the sound quality lacks the clarity of the Poetry Archive recording, the uneven audio levels provide a more authentic experience of what hear ing this poem in a large crowd at an outdoor fes tival would have felt like. The spontaneity of live performances, including sound glitches and back ground noises, becomes part of what Brathwaite characterizes as the sonority contrasts of total ex pression. As Eichhorn points out, these intruders are precisely what sound technicians often seek to filter out as they prepare recordings for the archive. The Poetry Archive version of Di Great Insohreck shan follows the predominant soundediting style for Internet audio archives. Martin Spinelli de scribes this style as the seamless edit, designed to highlight the poets voice and minimize all other dis tractions, including the recording scene whether live or instudio and the material elements of their

production.http//www.ubu.com/papers/object/
spinelli.pdf. Spinelli criticizes poetry sound editing for being too in;
, questioning why most archived poetry recordings present sound as
quotation the seamless, invisible, inaudible edit which dislodges not,
, which interrupts nothing, which is in fact deployed to remove inter
, to remove digression and to clarify.

In addition to using conventional soundediting, $Johnsons\ author\ page\ follows\ the\ standard\ visual$ design that can be found on The Poetry Archive as $well\ as\ other\ online\ poetry\ collections\ such\ as\ PennSound.$ His page features an author portrait rather than $a\ performance\ action\ shot,\ a\ biography,\ and\ links$ to individual poem tracks. Beneath the poem title and author name, one can click the play button and listen to the recording. The Poetry Archive uses a simple audio player that allows a listener to start, pause, and stop the track. Johnsons author biogra phy explains that his poems on the site were recorded $from\ live\ performances\ and\ come\ from\ his\ CD\ LKJ$ A Cappella Live. Despite the claim that the energy of his live recitals gives the recordings a unique electricity, interspersed with the laughter and ap plause of audiences around Europe, the seamless editing of Di Great Insohreckshan allows one to lis ten to Johnsons entire recitation before realizing $that\ it\ is\ a\ live\ performance. http://www.poetryarchive$.org/poet/lintonkwesijohnson. Once the poem ends, the only audible audience noises are a cough and polite applause that slowly fades out. Rather than convey a unique electricity, the cough suggests a subdued audience who tried to remain silent un til the end of the performance. The page provides no information about the specifics of the event or who the European audience was, although it sounds $like\ it\ might\ be\ a\ poetry\ reading\ in\ an\ academic\ set$ ting. The track certainly holds no trace of a com munal dub consciousness. By not clearly identify ing the track as a single performance, the archive

Onuora quoted in Morris, Is English We Speaking,.

presents it as the authoritative audio version. In the lefthand margin, under the heading About the Poem, it lists the themes as social, unrest, race, and Caribbean but provides no information about the Brixton Riots.

Derek Furr notes that while online poetry collec tions devote attention to different aesthetics, what unites them is the idea that hearing a poet voice her own work is crucial to understanding the poem. Yet despite the interest in vocalization, collections $tend\ to\ downplay\ the\ setting\ of\ the\ poets\ performance$ by providing little information about when and where the reading occurred and why this particular event was recorded. While certain sites, such as PennSound, $make\ sure\ that\ all\ of\ the\ bibliographic\ in\ fo\ is\ embed$ ded in the single file with accurate metadata, often all that this provides is the date and physical loca tion of the reading. By divorcing the poem from its contextual setting, this approach erases the recipro cal relationship between the poet and her audience. Furr proposes that poetry recordings both live and instudio become valuable because when we close lis ten, we hear not only the sounds of the poem and the poets voicing of them, but also the echoes of pre vious scenes of reading and listening. Through web page design and sound editing, The Poetry Archive downplays the previous audiences of Di Great In sohreckshan so that the online user feels as though she is the only person in the audience. While The $Cents\ Movement\ illustrates\ how\ cinematic\ approaches$ can be used to deepen total expression, the John son example illustrates the value of preserving the ephemeral qualities of a live performance in a record ing to enrich the listening experience. Furr borrows Charles Bernsteins term close listening to charac terize how a user should engage with audio record ings. Based on his experience with PennSound Bern stein proposes close listening as an alternative to

close reading, where one prioritizes the material ity of sound and the aural experience. Yet, in practice, how much does close listening actually deviate from close reading on Internet audio archives

Annie Murray and Jared Wiercinski, curators $of\ SpokenWeb,\ a\ collection\ of\ recordings\ of\ a\ Mon$ treal poetry reading series from to, point out that while most Internet audio archives make listening $the\ focus, their\ structure\ makes\ them\ multimodal.$ Accordingly, they stress that the visual elements ofonline poetry archives need careful consideration. They explore what kinds of site navigation, audio $visualization, design\ elements\ and\ functionalities$ could be offered by a Webbased spoken word inter face, and how these might enhance the listening $process\ and, ultimately, the\ scholarly\ endeavor. http$ //firstmonday.org/ojs/index.php/fm/article/view//.Because very little scholarship exists on how peo ple engage with sounded poems, they acknowledge that their suggestions for a sound archive recipe that other cultural heritage institutions can follow are based on established reading practices.http// $digital humanities.org/dhq/vol///.htmlp.\ They\ make$ some helpful suggestions, including using a wave form display for sound visualization, and provid ing listeners with a media player that allows them more control over the playback. They also suggest incorporating any available images and videos of the performance event, much like The Cents Move ments photo documentation on Twitter and Face $book.\ However, other suggestions such as tethering$ audio playback with a written transcript keep the primary focus on reading rather than listening. For example, on the Poetry Archive site, beneath

the link to play Di Great Insohreckshan, one can also click on a Read this Poem link. This encour ages scholars to engage in what is, for many, the more familiar interpretive practice rather than to develop new modes of analysis based on sound. In digital archives, Bernstein suggests that poems, $set\ adrift\ from\ their\ visual\ grounding\ in\ alphabetic$ texts, might begin to resemble the songs from which, for so long, they have been divided. However, to achieve this we need to be wary of a onesize fitsall approach, and carefully design visual elements to encourage $sonic engagement \ rather \ than \ to \ reify \ a \ visual \ econ$ omy of text. Such a divide between song and poem $has\ never\ existed\ for\ Anglophone\ Caribbean\ perfor$ mance poets, yet colonial legacies continue to dic tate that we read rather than listen to this work.

Even when one is only listening, Internet audio archives often recreate the feeling of reading alone. Clicking on the link and listening to the poem while one looks at the author portrait similar to the style $found\ on\ book\ jackets\ mimics\ the\ experience\ of\ soli$ tary reading, where one feels in private conversa tion with the author. Simple audio players that have only a linear timelapse bar rather than a more complex waveform display encourage the eyes to move from right to left, as they do in the act of read ing. When a poem is presented as a decontextual ized single track, a listener is encouraged to adopt a new critical approach and treat the poem as a self contained object. Listening, like reading, becomes $an\ isolated, individualistic\ expression\ rather\ than$ $a\ communal\ endeavor.\ Sound\ reproduction\ technolo$ gies have also encouraged our hearing to become more individualistic. Using headphones as his ex ample, Sterne argues that such devices encourage listening to be more orientated toward constructs of private space and private property, which encour ages sound to become a commodity.

Sterne, The Audible Past, .

In contrast, The Cents Movement recreates the communal experience of listening to a poem, which is a key part of total expression. Their photo tweets and poetry videos make online members a part of their participatory audience. We have much work to do to figure out how to build Internet audio archives that recreate this communal experience of listen ing. Everythingincluding sound editing, interface, database design, navigation system and copyright issuesneeds careful consideration to realize the dig ital potential of total expression. To embark on this work, it is crucial that we turn to the poets them selves and build on their education legacies.

So much of the history of the voice has already been lost, or muted, by the ongoing colonial bias to ward nation language, as well as limited resources and funding. Caribbean poetry recordings that sur vive buried in dusty boxes in attics and library stor age rooms sit silently waiting for new audiences to return to them the noise and sounds that the maker makes. Since these reeltoreel tapes, cassettes, eight tracks, CDs, and LPs are fragile media, threatened by technological obsolescence and sometimes the tropical Caribbean climate, we must make digitiz ing this vital record of Caribbean poetry history a priority.

Brathwaite, History of the Voice, .
